

PROBLEM BASED LEARNING (2x pertemuan)

SKENARIO PBL 1

A dentist feels that lately patients who come for a dental examination tend to be in a condition of teeth that are already severe. This condition makes the cost of treatment is high, causing many patients refusing the treatment. The dentist felt that he had to do more promotive and preventive programs for his patients. The dentist then joins the primary dental health care education program that studies related to excellent service, the principle of a healthy paradigm, the concept of a primary care dentist, the principle service of primary care dentist, and the procedure to become a primary care dentist. After becoming a primary care dentist, the dentist began to provide comprehensive services both to these patients and their families, and even more patients came for dental consultations without requiring high-cost treatment.
