

PROBLEM BASED LEARNING (2x pertemuan)

SKENARIO PBL 2

The lack condition of quality oral health care in Indonesia, currently made government implement the program of primary care dentist. The government contracted a general dentist to serve 10.000 people, running family dentist program and also appoint the third party. Noted in the MoU, type of service, unit cost, utilization, premium, capitation, and In-CBG's system financing. The family dentist system and manage care must be executed by the concept of Health Paradigm, so it is expected that the capitation for the payer dan all of the oral health care with 10.000 people will be assured. The third party will always monitor the service quality and required report on periodic. The family dentist system with its Health Paradigm will develop mutual cooperation for all parties and assure the quality and the health financing.
